Discover Pods decided to embark on the Podcast Trends Report with a very clear goal in mind: to better understand listener behavior, further benchmark the potential of podcast advertising, and prioritize the challenges facing the podcast industry and podcasters alike.

The report takes both qualitative and quantitative collection tools, but is rooted in the self-selected survey. We surveyed 1,203 people who are active in various web-based podcast communities. Out of the 1,156 respondents, 234 identified themselves as podcasters.
